Trading Facilities and Electronic Trading

PSPL's trading facilities are supported by computer-based component systems for the order-routing, execution, matching, registration or clearing of trades. As with all facilities and computer systems, customers will be exposed to risks associated with the systems including the failure of hardware and software. The result of any system failure may be that the Customer's order is either not executed according to instructions or is not executed at all. The Customer should also be aware that the Internet is not a completely reliable transmission medium and there may be delays in service provisions.
