PRODUCT SUITABILITY

WHO IS THE PRODUCT SUITABLE FOR?

- The Sub-Fund is only suitable for investors who:
 - want capital growth and regular income in the form of dividends;
 - seek an index-based approach to investing in a diversified basket of stocks listed on the SGX-ST in a cost effective and easy to access manner; and
 - believe that the Index will increase in value over time.

Refer to Section A of Appendix I to the Prospectus for further information on product suitability.

KEY PRODUCT FEATURES

WHAT ARE YOU INVESTING IN?

- You are investing in an exchange traded fund that aims to replicate as closely as possible, before fees and expenses, the performance of the Morningstar® Singapore Yield Focus IndexSM.
- The Index is compiled and maintained by Morningstar Research Pte. Ltd. and is designed to screen for high yielding stocks listed on the SGX-ST with superior quality and financial health. The Index Securities and their respective weightings within the Index will be reviewed and rebalanced semi-annually on the third Friday of June and December each year.
- The Manager currently intends to declare semi-annual distributions to Holders in June and December of each year or at such other times as the Manager may determine. The Manager may make distributions out of distributable income and/or the capital of the Sub-Fund. Distributions (whether out of income and/or capital) may have the effect of lowering the Net Asset Value of the Sub-Fund and this will be reflected in the Redemption Value of the Units. Moreover, distributions out of capital may amount to a reduction of a Holder’s original investment. Holders redeeming

Refer to Sections B, D and H of Appendix I to the Prospectus for further information on features of the Sub-Fund.

¹ The Prospectus is available for collection at the Manager’s registered office at 250 North Bridge Road, #06-00 Raffles City Tower, Singapore 179101, from Monday to Friday during normal business hours, or accessible at www.phillipfunds.com.

<p>their Units may therefore receive an amount less than their initial investment. Such distributions may also result in reduced future returns to Holders. Investors should note that distributions are not guaranteed and are subject at all times to the Manager’s discretion.</p>	
Investment Strategy	
<ul style="list-style-type: none"> • The Manager employs a “passive management” or indexing investment approach designed to track the performance of the Index. • The Manager intends to carry out its investment strategy via a replication strategy as described below. • Using a replication strategy, the Sub-Fund will invest in substantially all the Index Securities in substantially the same weightings (i.e. proportions) as the Index and the Application Basket may comprise odd lots of the Index Securities. For purposes of tracking the Index closely, the Manager may, from time to time, adjust the number of odd lots of Index Securities in each Application Basket. • However, if the Manager believes that a replication strategy is not the most efficient means to track the Index, the Manager may decide to adopt a representative sampling strategy instead. • Using a representative sampling strategy, the Sub-Fund will hold a representative sample of a portfolio of securities selected by the Manager using quantitative analytical models in a technique known as “portfolio sampling”. Where a representative sampling strategy is employed, securities that are not constituents of the Index may be held by the Sub-Fund. Such securities will be expected to have a high level of correlation or a similar valuation or market capitalisation as the Index Securities. • The Manager will seek to construct the portfolio of the Sub-Fund such that, in the aggregate, its capitalisation, industry and fundamental investment characteristics perform like those of the Index. • The Manager may use or invest in financial derivative instruments in accordance with the Securities and Futures (Capital Markets Products) Regulations 2018 and Appendix 1 of the Code on Collective Investment Schemes. 	<p>Refer to Section B of Appendix I to the Prospectus for further information on the investment objective, approach and strategy.</p>
Parties Involved	
<p>WHO ARE YOU INVESTING WITH?</p> <ul style="list-style-type: none"> • The Manager is Phillip Capital Management (S) Ltd. • The Trustee and Registrar is HSBC Institutional Trust Services (Singapore) Limited. • The Custodian is The Hongkong and Shanghai Banking Corporation Limited. 	<p>Refer to Paragraphs 8.1, 8.5, 8.6 and 8.8 of the Prospectus for further information on the role and responsibilities of these entities.</p>
KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>The price of Units and any income earned on the Units may go down as well as up, and you may not get back the amount you have invested in the Sub-Fund. The risk factors below may cause you to lose some or all of your investment. However, these risk factors identified are not exhaustive and you should refer to the Prospectus for a fuller description of the risk factors.</p>	<p>Refer to Paragraphs 6 and 7 of, and Section C of Appendix I to, the Prospectus for further information on the risk of the Sub-Fund.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • You are exposed to market risk. <ul style="list-style-type: none"> ○ The Net Asset Value of the Units will fluctuate with changes in the market value of the Index Securities held by the Sub-Fund. Investors in the Sub-Fund are exposed to the same risks that investors who invest directly in the underlying securities would face. ○ The secondary market price of Units may sometimes trade above or below the Net Asset Value. There is a risk, therefore, that Holders may 	

<p>not be able to buy or sell at a price close to the Net Asset Value. The deviation from Net Asset Value is dependent on a number of factors, but will be accentuated when there is a large imbalance between market supply and demand for Units on the SGX-ST.</p>					
Liquidity Risks					
<ul style="list-style-type: none"> • The secondary market may be illiquid. <ul style="list-style-type: none"> ○ You can sell your Units on the SGX-ST. However, you may not be able to find a buyer on the SGX-ST when you wish to sell your Units. While the Sub-Fund intends to appoint at least one market maker to assist in creating liquidity for investors, liquidity is not guaranteed and trading of Units on the SGX-ST may be suspended in certain situations. ○ If the Units are delisted from the SGX-ST or if the CDP is no longer able to act as the depository for the Units listed on the SGX-ST, the Sub-Fund may be terminated and Units will be redeemed in accordance with the termination provisions in the Trust Deed. • Redemption through Participating Dealers. <ul style="list-style-type: none"> ○ Investors can only redeem Units through Participating Dealers if they are clients of the relevant Participating Dealer, subject to such terms and conditions as may be imposed. A redemption application shall only be made or accepted in respect of Units constituting an application unit size of 50,000 Units (or such higher number of Units in multiples of 1,000 Units). 					
Product-Specific Risks					
<ul style="list-style-type: none"> • You are exposed to concentration risk. <ul style="list-style-type: none"> ○ The Index Securities are comprised of stocks listed on SGX-ST and may be less diversified compared to a broad-based fund, such as a global or regional equity fund. Hence, it is more susceptible to fluctuations in value resulting from adverse conditions in the relevant region. • You are exposed to passive investment risk. <ul style="list-style-type: none"> ○ The Manager does not attempt to select securities individually or to take defensive positions when the Index moves in an unfavourable direction. The Sub-Fund invests (either directly or indirectly) in the Index Securities regardless of their investment merit, except to the extent of any representative sampling strategy. The lack of discretion on the part of the Manager to adapt to market changes due to the passive investment nature of the Sub-Fund will mean that falls in the Index are expected to result in corresponding falls in the value of the Sub-Fund, and investors may lose a significant part of their investment. • You are exposed to tracking error risk. <ul style="list-style-type: none"> ○ Factors such as fees and expenses of the Sub-Fund, imperfect correlation between the Sub-Fund's assets and the Index Securities constituting the Index, changes to the Index and regulatory policies may affect the Manager's ability to achieve close correlation with the performance of the Index. The Sub-Fund's returns may therefore deviate from the Index and there is no assurance that the Sub-Fund will be able to fully track the performance of the Index.
