KEY RISKS	
<p>WHAT ARE THE KEY RISKS OF THIS INVESTMENT?</p> <p>You should be aware that the price of Shares can go down as well as up. The value of the product and its dividends or coupons may rise or fall. The following are key risk factors that may cause you to lose some or all of your investment:</p>	<p>Refer to Section IX of the Prospectus for further information on risks of the product.</p>
Market and Credit Risks	
<ul style="list-style-type: none"> • Shares may trade at prices other than NAV <ul style="list-style-type: none"> ○ The secondary market price of Shares may sometimes trade above or below the NAV per Share. This deviation is dependent on various factors but will be accentuated when there is a large imbalance between market supply and demand for Shares on the SGX-ST. There is a risk that you may not be able to buy or sell at a price close to the NAV per Share. • You are exposed to market risk <ul style="list-style-type: none"> ○ The price of securities comprised in the portfolio of the Sub-Fund and the Shares, and the income from them, may be influenced by political and economic conditions, changes in interest rates, the earnings of the corporations whose securities are comprised in the portfolio and the market's perception of the securities. 	

Liquidity Risks	
<ul style="list-style-type: none"> • You are exposed to the liquidity risk <ul style="list-style-type: none"> ○ The extent of market liquidity is dependent on the size and state of the markets and therefore affects the Sub-Fund's ability to acquire or dispose of securities at the price and time it so desires. • You should be aware there is a minimum creation and redemption size <ul style="list-style-type: none"> ○ Shares will only be issued or redeemed in-kind at the Company's discretion in Creation Unit or Redemption Unit aggregations (currently 500,000 Shares, and multiples thereof) or in cash at a minimum of 50,000 Shares (or such other higher number of Shares in multiples of 1,000) by or through Participating Dealers. ○ If you do not hold the minimum redemption number of Shares (i.e. 50,000 Shares), you will only be able to realise the value of your Shares by selling your Shares on the SGX-ST at the prevailing trading price of the Shares. ○ However, do note that the Participating Dealers are under no obligation to redeem your Shares. • Trading in Shares on SGX-ST may be suspended or even delisted <ul style="list-style-type: none"> ○ You will not be able to purchase or sell Shares on the SGX-ST during any period that the SGX-ST suspends trading in the Shares. Subject to the provisions of the CIS Code, the creation and redemption of Shares will also be suspended if the trading of Shares on the SGX-ST is suspended. ○ The Sub-Fund may not be able to continue to meet the requirements necessary to maintain the listing of Shares on the SGX-ST. The Sub-Fund may be terminated if Shares are delisted from the SGX-ST. 	<p>Refer to Sections IX and XIII of the Prospectus for situations in which trading of Shares may be suspended.</p>
Product-Specific Risks	
<ul style="list-style-type: none"> • You are exposed to tracking error risk <ul style="list-style-type: none"> ○ Changes in the NAV of the Sub-Fund or the Underlying Fund are unlikely to replicate exactly changes in the Index due to various factors. Factors such as fees and expenses of the Sub-Fund or the Underlying Fund, liquidity of the market, imperfect correlation of returns between the Sub-Fund's or the Underlying Fund's securities and those in the Index, changes to the Index and regulatory policies may affect the Manager's or the Underlying Fund Manager's ability to achieve close correlation with the Index. • You are exposed to feeder risk <ul style="list-style-type: none"> ○ The Sub-Fund invests, as a Feeder Fund, all or substantially all of its Net Asset Value into the Underlying Fund under the SZSE-SGX ETF Link ("ETF Connect"), which rules are subject to change from time to time, as may be determined by the SGX-ST, SZSE and the relevant regulatory authorities. In the event that the Sub-Fund is unable to comply with the ETF Connect rules on a continuing basis, the Sub-Fund may not be able to continue investment in the Underlying Fund or may be required to divest its investment in the Underlying Fund and invest into other underlying funds which track the Index. This may adversely impact the Sub-Fund's value, depending on the ETF Connect rules, as amended from time to time. ○ The Sub-Fund which invests all or substantially all of its Net Asset Value into the Underlying Fund is subject to the risks associated with the Underlying Fund and its performance will depend on the performance of the Underlying Fund. The ability of the Sub-Fund to meet its investment objective is also largely dependent on the Underlying Fund. ○ The Sub-Fund does not have control of the investments of the Underlying Fund and there is no assurance that the investment objective and strategy of the Underlying Fund will be successfully achieved, which may have a negative impact to the Net Asset Value of the Sub-Fund. Shareholders also do not have any direct interest in the units of the Underlying Fund and will not be able to exercise any voting rights in respect of the Underlying Fund. • You are exposed to single region/concentration risk <ul style="list-style-type: none"> ○ The Sub-Fund is subject to concentration risk as a result of tracking the performance of a single country (i.e. PRC). Where the Sub-Fund invests in a single country, it will be exposed to fluctuations in the economies of the country, and the market, currency, political, social environment and other risks related 	

<p>specifically to this country, which may affect the market price of its investments in this country. Exposure to a single country also increases the potential volatility of the Sub-Fund due to the increased concentration risk as they are less diversified compared to exposure to global markets.</p> <ul style="list-style-type: none"> You are exposed to Emerging Markets risk <ul style="list-style-type: none"> Investments in securities of emerging markets (e.g. PRC) are in general more volatile than those of developed countries, with the result that the Shares may be subject to greater price volatility. <p>You should be aware that your investment in the Sub-Fund may be exposed to other risks of an exceptional nature from time to time.</p>
